PROFILE SUMMARY

Aspiring Full Stack Developer with hands-on experience in Java, Python, Spring Boot, RESTful APIs, MySQL, React.js, HTML, CSS, and JavaScript. Strong foundation in Object-Oriented Programming, Data Structures, and Database Management Systems, with experience developing scalable full-stack applications through academic and personal projects. Skilled in problem-solving, debugging, and Agile development, with a commitment to building clean, maintainable, and efficient software solutions.

SKILLS

- Programming: Java, Python, C, Data Structures (Arrays, LinkedList, Stack, Queue)
- Frontend: HTML, CSS, JavaScript, React JS, jQuery, Bootstrap
- Database & Framework: MySQL, DBMS, Spring boot, Django
- Concepts: Object-Oriented Programming (OOPs), SDLC, Agile Methodology, JPA, 3-Tier Architecture, CI/CD, Servlet, Spring MVC, Java 8, JDBC, AI/ML Fundamentals
- Soft Skills: Problem Solving, Debugging, Team Collaboration, Analytical Thinking, Troubleshooting
- Tools: Eclipse, VS Code, Git, GitHub, Maven, AI-assisted development tools, Postman, Power BI, Tableau

PROJECTS

USER QUERY AND SUPPORT PORTAL (Freelance Web Developing Project, Jan 2026):

- Built and deployed a fully responsive User Query Portal from scratch using HTML, CSS, JavaScript, Bootstrap, and jQuery, enabling seamless query submission and real-time status tracking for end users.
- Engineered an interactive and user-friendly UI with dynamic form validation and smooth navigation, significantly improving user engagement, usability, and overall query resolution efficiency.

DESKTOP BASED CODE EVALUATION AND PRACTICE PLATFORM (Oct 2025):

- Built a Hacker Rank-style code compiler system that provides user signup and login with database authentication. It allows users to view coding problems, write programs, compile and execute code in real time, and automatically validate outputs.
- The system uses Java Swing for UI, JDBC for MySQL integration, and core Java execution features to simulate an online coding platform.

ENTERPRISE WEB APPLICATION USING DJANGO (Dec 2025):

- Developed a scalable web application using Python, Django, and MySQL with full CRUD functionality. Implemented secure authentication and role-based access control for user management.
- Designed responsive interfaces using HTML5, CSS3, and JavaScript. Integrated search, dashboard reporting, and optimized database queries to improve system performance and usability.

INSTAGRAM CLONE (Mar 2026):

- Developed a front-end Instagram clone using React JS to understand component-based architecture, state management, routing, and responsive design. The project enhanced my skills in React Hooks, API integration, and real-world UI development.
- Technology used in this project include React JS, JavaScript, Bootstrap, JSON, HTML, CSS, GitHub.

EDUCATION

- 2021-2025 B.E - Electronics and Communication Engineering at Sona College of Technology (CGPA – 7.4)

CERTIFICATIONS

- Master Program in Full Stack Development Using JAVA - Livewire
- Certification in Java Programming - NPTEL
- Workshop on IOT Sensors - KRISHTEC, Coimbatore
